SKILLS

Group Title

JavaScript	Git/GitHub	HTML/CSS	Node.js	React
SQL/NoSQL	MongoDB	Tailwind	TypeScript	Next.js

VOLUNTEERING

Web Development Team

Viable Community   📅 08/2025 - Present

The Viable Community is a non-profit organization that committed to the preservation and regeneration of nature. I actively took a role in Dashboard project, which is a comprehensive web application built with Next.js, React, and TypeScript. It serves as a centralized portal for community members to collaborate on projects, manage user permissions, track contributions, and access organizational resources.

Community Gardening Assistant

Natuurhus Almelo   📅 2024

Helped elderly community members with gardening tasks, offering support with planting, maintenance, and outdoor upkeep while encouraging social interaction and well-being.

PROJECTS

ELVA - Trip Planner

🔗 https://c51c.hyf.dev/

- ELVA helps travelers to create their own trip plans by adding the locations, cities, photos and personal notes and ratings and lets them share their experiences.
- Developed with React + Vite, Node.js, Zod, Tailwind and MongoDB

GlobeScape

🔗 https://globescape.netlify.app/

- GlobeScape is a multipage web app, that allows users to explore countries across the world using an interactive world map.
- The app fetches detailed information such as each country's capital, flag, continent, population, and languages.
- Users can mark countries as visited or add them to a wishlist for future travel plans.
- Developed with React + Vite, CSS, Local Storage and REST Countries API

FilmQuest

🔗 https://sertanrdn.github.io/FilmQuest/#Home

- Discovery app that allows users to explore a wide range of films.
- This app interacts with TMDB API to fetch data about the films such as plot, title, released year, poster, rating etc.
- Users can search for films and see the related results and add the films to their favorites.
- Developed with JS, HTML, CSS and TMDB API
